VICTORIA, Dec. 13, 1867. To Michael Wallace, Esq., Hon. Sec. Ama teur Dramatic Club.

My DEAR SIE:-Having laid your letter before the Directors of the Royal Hospital, troupe will close their engagement. Should at a meeting held this day, it was resolved, "That the liberal donation of \$435 45, the Institution by the Amateur Dramatic Club and their valuable services, be gratefully acknowledged." The thanks of the Directors are likewise tendered to Mrs Jenny Arnot Fowlis for her kind and gratuitous efforts, and also to the Gas Company for lights supplied free of charge.

I remain, my dear sir, Very truly yours.

DISASTER-While leaving Nanaimo, a few days ago for Portland, Oregon, with 90 tons of coal and a quantity of oil and cranberries on board, the schooner Crosby ran on the rocks outside the harbour, where she lay for three days, and before she could be floated off all the coal had to be thrown overboard. The Crosby is now lying at Nanaimo undergoing picked up far astern.

WANTED .- A STEAM FIRE ENGINE .- If there be one thing more than another that our city stands in need of it is adequate protection fr m the ravages of the fiery element. The inefficiency of the hand apparatus in cases of extensive conflagration has been abundantly hown in other cities; and it would be bad policy were our citiz-ne to result. await the occurrence of a serious destruction of property before they recognized the importance of substituting a more reliable and efficient mode of suppressing fires for the means now at their command. The fire on Humboldt road, a week ago, furnishes a case in point. The firemen were so exhausted from the effects of their long run that they could scarcely move the brakes of their engines; and had the burning building been surrounded by others, the destruction of property would have been very great; but had a "steamer" occupied the place of the hand . engines, there could have been no destruction of property upon that score. A steam engine well fed with fuel and water never stops work from fatigue-a man does, when overworked, be be ever so well fed. A steam fire engine, costing \$3000 laid down here, would perform more service than six of the best hand-engines ever 'made manned by 300 men, and by pouring two or more steady streams upon a burning building would drown preciation of the liberal patronage I have out any fire of reasonable size that is likely to received from the citizens of Victoria, I break out here for years. The Municipality might be induced to vote \$500 towards the object, and there occasion. Leaving your committee to is surely liberality among the Insurance holders generally, to make up the remainder. With a steam fire-engine we might rest comparatively secure against the occurrence of a great fire; but in our present state of inefficiency, the town-site, with a stiff sou'wester and a fire prevailing simultaneously,

THE AMPITHEATRE. - The pouring rain of last evening kept many from the Ameitheatre who would otherwise have attended. The performances were, however, capital. The great tight-rope performance was rendered successfully by Miss Matild; the young lady, after reaching the dress-circle, walking backwards to the stage. This afternoon there will be a special performance for families and children, and this evening the the weather prove fine we hope that the liberal and kind-hearted proprietor of the nett proceeds of a benefit in sid of that troupe will be accorded a full house on both

"This morning, the train coming in from the west, on the Grand Trunk, bore among its passengers four or five farmers from the neighborhood of Georgetown, eager to change the Royal Canadian Bank bills for gold. The train met with some slight delay before reaching the station, which was more than one excitable individual could bear. Fearful lest the bank might break in the meantime, he jumped from the train, making 2:40 time to the station, and bore up Yonge street with his cont tails flying at an angle of forty five, looking like one perfectly distracted. Arriving breathless and panting at the bank he was overjoyed to find the institution still solvent, and speedily obtained the coveted specie to the amount With the gold in his pocket he went about some little business in the city, and about two hours afterwards he discovered, to his grief and horror, that his money was gone, having been removed by some adroit pickpocket.

Valuable mines of antimony have been opened within the last few years in Prince William, N. B., and in one of those it has been discovered that the voin of antimony is strongly impregnated with silver. The tests go to show that a ton of antimony will yield eighteen hundred oz of silver, which, if correct, will make it equal to the richest silver mines in Mexico. The mine in which the silver has been discovered is owned by Mr. Thos. F. Hutchinson, proprietor of the New Brunswick and Nova Scotia Directories. 2,000 men will, it is said, be employed there next spring.—St. John Morning News.

Gold has been discovered in Victoria county in paying quantities, and several claims have been taken up by persons who have had mining experience on the Pacific coast. — Ib.

A NEW BRUNSWICK AUTHOR -James De Mill, A. M., Professor of Rhetoric and History in Dalhousie College, is the author of a Novel entitled "The Cord and the Creese, or the Brandon Mystery,' which is commenced in the first number of a new periodical entitled Harpers' Bazaar, an illustrated weekly of Fashion and Household Literature, just launched in New York by the Harpers. This novel, it is said, has been read in manuscript by several competent critics, who unanimously pronounce it, in point of interest of plot, variety of adventure and graphic delineation of character, to be fully equal to any of the novels of Wilkie Collins. The Professor had previously become somewhat popular as the writer of the the fire-proof Brick Store, very clever "Dodge Club" papers, which Old Original Coffee Stand.

The Toronto Telegraph says:—The spirit of economy that is to actuate the government of Ontorio is evidenced by the fact that the Hon J S Macdonald will conduct in person the Crown business at the present assizes. At Cork, Ireland, a gentleman had often taken his little son to see the play. Thinking the boy was getting old enough to attend the service at church, he took him there one Atstralia service at church, he took him there one; Sunday. Patiently the child sat for a time; but faceying that it was time the amusements began he commenced clapping his hands and horrified his father by shouting with all his might at the top of his tiny shrill voice, 'Up wid de rag!' (the usual cry in the Cork theatres when an audience consider it time for the curtain to rise.) for the curtain to rise.)

A weman about 35, named Schmidt, in the last stage of pregnancy, was run over by a coal cart on the Boulevard de la Villette, a few days ago, and received such injuries in the head that she expired shortly after at an apothecary's shop, whither sho had been conveyed. Drs Tixier and Sallath then deconveyed. Drs Tixier and Sallath then determined to save, if possible, the unbornchild, and by means of Cavarian operation delivered a fine healthy boy, who appeared in no way to feel the effects of the accident which had been fatal to the mother.

A German newspaper says that two years ago a Mr Christian Segenayer became father of ris fifty-eighth child. His first wife gave birth to twenty-three, of which six are twins and sleven single born; his second wife to nineteen; and the third and yet living wife is mother to sixteen children. Of these filty-eight are living, all being daughters.

The Lewiston Journal says: On Tuesday a girl 15 years of age, several weeks since from St John, N. B., commenced work in a tailor's shop. At noon she left the shop, but could not find her way to her boarding house as she had visited it but once. A young fellow volunteered to show her, but instead of that, the young rascal piloted her through several streets and tried to get her into house which was not the one she sought. As she would not enter be applied a handkerchief to her face and she remembers nothing until she was found on Lincoln street by woman who knew her. She had been ren-dered inscusible by chloroform and probably outraged. The officers are looking up the case and we trust the scamp will be found

A New Brunswicker has been elected a State Senator in the California Legislature Generally speaking the Canadian element on the Pac fic slope is exerting a powerful in fluence on the local State Institutions. The new territory of Montana, for instance, con tains a large infusion of Canadian blood and nearly all the leading shop and store keepers are from Quebec, Ontario. Nova Scotia and New Brunswick, and the French element in the population of the territory is so large that most of the store keepers are obliged to keep French speaking eler a in order to ac-commodate it.—Toronto Globs

THE ECONOMY OF HEALTH -- This busy nation of Americans have 12 000 000 work ing people, whose services may be estimated at \$2 a day, and their annual loss by sickness at an everage of ten days each in the year This gives a total loss of \$240 000 000 a sum three times as large as the whole cost of the General Government, including the Army, Navy, Post Offices, Legislators, Foreign Ministers and all. The amount weighs over six hundred tons in pure gold. A large proportion of this costly suffering might be averted by attention to diet, cleanliness, and above all, by the proper use of the right remedy in season. When a 25 cent box o Ayers Pills will avert an attack of illness which it would take several days to recove from, or a dollar bottle of Ayer's Sassaparilla will expel a lurking disorder that would bring the sufferer to his back for weeks or wonths, does it take any figures to show the good economy of the investment? When Fever and Ague is rankling in your veins and shak and Agus is taking in your veins and shading ing your life out of you, is it worth the dollar it oosts for his Agur Curr to have the villainous disorder expelled, which it dressurely and quickly? When you have taken a cold it is prudent to wait until it has settled on the lungs, when days or weeks or months must be spert in trying to cure it even if it can be great at all or is, it cheener to take can be cared at all, or is it cheaper to take Ayer's Cherry Pectoral, costing a few shillings, and remove the trouble before it is serious? It takes no wisdom to decide.

Postal Affairs.

A short time since we called attention to the sad condition of the Postal affairs of this Colony, complaining of Steamboat Company that has been so liberally subsidized by our Government, and also pointing out the fact of its being the duty of the United States Government to deliver our mails at the nearest point to our borders to which their mail routes may extend. Nor did we excuse in any way the neglect of our local Government in permitting the people of this Colony to be so grossly imposed upon in a matter of such great importance. There is, however, another feature in this abuse which we have so long sustained, that deserves something more than a passing notice, and one to which we are afraid the Government have given no consideration. We allude to the undue proportion of tax paid by the people of this Colony upon all postal matter coming into or going out of the country. By a Postal treaty between the United States and the British Provinces, made in 1862, a rate of 10 cents on a single letter was fixed for conveyance, from any part of the United States, and vice versa, not exceeding three thousand miles; and 15 cents beyond that distance, each country having the privilege of pre-paying in full with its own stamps, or at the place of delivery, in its own coin, no postal accounts being kept between the Governments thereof, the revenue to each being considered equal. Now, contrast the above arrangement with the system in operation in this Colony. For instance, if we wish to send a letter to England, we are obliged, in addition to our Colonial rate of 5 cents, to affix, in American stamps, 24 cents; if to the Provinces, 15 cents; or if to the United States, 10 cents, which stemps we are obliged to import for the purpose, paying generally some two or three months in advance of the mailing-and when the operation is reversed, the same rates are exacted in advance, previous to letters reaching this Colony Now, the amount of postage paid is not so much a matter of complaint as the unequal manner in which the revenue falls, we being obliged to pay much the largest propostion of the postage on our correspondence with all other countries. and our revenue being the least benefitted through it, for upon every leta tersent out of the Colony we are obliged to pay 10, 15, or 24 cents into the revenue of the United States, in that the suspension of the Commercia in no case does a foreign correspondent contribute to the postal revenue of mismanagement, so gross as to be alto. this Colony; we have not the gether exceptional. The principal offend privilege, as they have in all other er, there is no necessity for disguising, ter in full in our own stamps or currency, or of paying upon delivery the colossal railroad loan, which was the amount of postage accruing beyond our own borders; and more particularly is this system oppressive in our correspondence with the United States, for upon every exchange of correspondence, which costs 30 cents, we pay two-thirds of the amount, only one-third of which falls into our revenue, or in other words, one-half that we pay goes to the revenue of the United States, and those who correspond with us from that country pay nothing into ours. In the case of our correspondence with San Francisco, the ovil is ten-fold aggravated, for we are compelled to carry the mails 800 miles along their coast, and pay ten cents a letter for the privilege of depositing it in their own Postoffice, that department never having conveyed it one foot beyond the walls manager who led the institution into this of the Post-office. We also bring their difficulty, which, by locking up so large a letters to this Colony free of charge, a portion of its available means ultimately duty we have distinctly stated led to its suspension. The transaction in a previous article we have no was one which no prudent banker would right to perform; for we are clearly have looked at, and which Mr Ross of the opinion that instead of its be- should never for a moment have entertain ing the duty of this Government to ed. The managers of the bank of Upper subsidize a steamer for that purpose, Canada were responsible for no single

water, instead of delivering them at San Francisco, a distance of 800 miles from their destination, in which space own territory, across which there is a regular weekly mail communication, both by land and sea. Did they perform this part of their duty and deliver to us weekly the mails at an accessible point contiguous to our borof the exorbitant tax of \$500 per averse to sharing with them the cost of subsidizing a good steamer to convey the mails between this Colony and Washington Territory. We have already remarked that the Governments of England and the British Provinces have for the last 16 years had fair and equitable Postal arrangements with he United States. Why then, ws would ask, cannot this Colony enjoy a a Crown Colony and do not deserve the privileges enjoyed by other Colonies? Or is it owing to the indifference or imbecility of our local Government? Have we a Postmaster General, and what are his duties? Surely we think the authority of an official with such a high sounding title should extend beyond the limits of the local Postal department of this petty Colony, and if so, we wonder how many times he has communicated with the Postmaster General of the United States, or with anbody else, in regard to Postal matters?

Our Canadian Letter.

[From an Occasional Correspondent.]

Hamilton, October 29th 1867. About a month since, the elections for the Commons and Local Legislature were terminated and the excitement which has been very great, has now entirely subsided. The returns show a decided majority in favor of Sir John A. Macdonld's government, that is, of gentlemen who will allow it a fair and impartial trial be-

fore deciding against it. On Tuesday last, the 22d inst., the people of Hamilton and the country at large, were astounded by the intelligence of the failure of the Commercial Bank of Canada On Monday previous a meeting of bank managers was called in Montreal to decide upon the advisability of supporting the Commercial, and the decision being unfavorable a circular was addressed to the Managers of the various branches in Ontario by Mr R. J. Cartwright, the president, desiring them to close their doors and make public the fact that owing to a continued drain upon the resources of the bank by the withdrawal of deposits, and their inability to obtain adequate assistance, the company were obliged to suspend specie payment. The excitement at Kingston, where the Head Office is situated, and in this city, where they did a very large business, amongst others, that of the Great Western Railway Company, was intense. Though great doubt had been felt as to the sound ness of the Commercial for some time past by the knowing ones as is evidenced by the withdrawal of deposits, yet the announcement on Tuesday caused a profound sensation amongst the public at large; the farming class in particular, being the greatest sufferers. The Leader of Saturday last comments upon it in the following fashion: "It is eminently proper addition to our own Colonial tax; and Bank of Canada should be put on the true ground. It was owing entirely to countries, of either pre-paying a let- was Mr. Ross, the chief manager. It was he who made the arrangement for the primary cause of the ruin of the bank, if ruined we are forced to consider it. The annals of banking scarcely furnish a more monstrous case of individual temerity and madness, than is shown in the loose and altogether improper arrangement for that loan. A million and a half of the capital of the bank came, in this way, to be locked up; and and after a long lawsuit to discover which of the two railway companies-the Great Western or the Detroit and Milwaukee -- was responsible, the matter had to be settled by the bank taking bonds of the latter company in security. The lawsuit consumed years of time, was carried through all the various stages to the House of Lords, and must have cost an immense sum. A grave mistake was made in not discharging from the service of the bank, long ago, the

mails upon which the postage is paid, rumors concerning the Royal Canadian and which they contract to convey, Bank, which ended in a run on that institheir postal routes, either by land or traders. The business community, merchants and others, took a prompt and energetic stand and immediately showed in their windows placards stating Royal intervenes two entire States of their | Canadian bank-notes would be taken at par, and in some places at a premium. The other banks also came forward in support of the Royal, so that the excitement, which at first threatened to be serious, soon subsided. A run was instituted on the Gore Bank in this city on the same ders, we would not complain so much day, but the confidence in this establishment was so great that nothing took place month which we pay for American of more consequence than the withdrawal postage stamps, nor would we be of a few hundreds by small depositors and bill holders. Too much praise cannot be awarded to the merchants and Bank managers of Toronto and Hamilton, who, by their spirited and generous conduct, thus averted that which might have resulted in a great commercial panic.

A grand Ball in honor of Colonel Farrington and the officers of the 29th Regiment, which has just replaced the 16th in this garrison, took place in Mechanics' the ungenerous treatment of the like privilege? Is it because we are Hall on Friday evening last. It was a very brilliant affair and was honored by the presence of His Excellency Major-General Stisted, Lieut. Governor of Ontario., and many other notabilities.

Rumors of the Fenians and their contemplated movements reach us from time to time from the other side, but they command no attention here. Late ailvices state that arms and amunition are concealed in various places along the frontier, sufficient to equip 10,000 men who are to constitute the noble F. B., army which is to conquer "this Canada of ours" next year.

A late copy of the Nor' Wester (Fort Garry) speaks highly of the Confederation scheme and strongly urges the people of Red River Settlement at once to seek admission and escape from the maladministration or rather no administration of the Hudson Bay Company.

HOLLOWAY'S PILLS .- Excellent Revivers .-The resources of medicine and chemistry were The resources of medicine and chemistry were long and fruitlessly tried before they yielded a remedy which could overcome disorders of the stomach and nerves, till Professor Holloway discovered his purifying and tonic Pills. They are the safest and surest correctives of indigestions, heartburn, flatuelency, torpidity of the liver; twitchings, mervous fancies, despondency, low spirits, and declining strength. Holloway's Pills supersede all erroucous actions in the body, and so strengthen and support the system, that discase departs, and leaves the patient little, if at all shaken. This is the grand-aim and object of medical act—to regulate disordered functions without damaging the constitution by the remedy, and admirably is this end attained by Holloway's Pills.

OAKLAND, Ind., 6th June, 1859.
J. C. Ayer & Co. Gents: I feel it my duty to acknowledge what your Sarsaparilla has done for me.
Having inherited a Scrotulous infection, I have
suffered from it in various ways for years. Sometimes it burst out in Ulcers on my hands and arms,
sometimes it turned inward and distressed me at the
stomach. Two years ago it broke out on my hea
and covered my scale hand me seyond description. I
tried many medicines and several physicians, but
without much relief from anything. In fact, the
disorder grew worse. At length I was rejoiced to
read in the Gospel Messenger that you had prepared
an alterative (Sarsaparilla), for I knew from your
reputation that anything you made must be good
I sent to Chicinnati and got it, and used it fill it
cured me. I took it, as you advise, in small doses of
a teaspoonful over a month, and used almost three
bottles. New and healthy skin soon began to form
under the scale, which after a while fell off. My
skin is now clear, and I know by my feelings that
the disease has gone from my system. You can well
believe that I feel what I am saying when I tell you,
that I hold you to be one of the apposites of the age,
and remain ever gratefully.

Dr. Robert M. Preble writes from Salem, N. Leucorrhem or Whites, 40 arisin Tumor, Uterine Ulceration, Femule Diseases. Dr. J. B. S. Channing, of New York City, writes: "I most cheerfully comply with the request of your agent in saying I have found your Sarsaparilla a most excellent alterative in the numerous complaints for which we employ such a remedy, but especially in Fenale Diseases of the Scrotluous diathesis. I have cared many inveterate cases of Leucorrhea by it, and some where the complaint was caused by ulceration of the ulcrus. The ulceration itself was soon cared. Nothing within my knowledge equals it for these female derangements. Edward S. Marrow, of Newbury, Ala, writes: "A dangerous oversian tumor on one of the females in my family, which had defied all the remedies we could employ, has at length been completely cared by your Extract of Sarsaparilla. Our physician thought nothing but extirpation could afford relief, but he advised the trial of your Sarsaparilla as the After taking your remedy eight weeks no symptom of the disease remains."

Syphilis and Mercurial Disease.

New Onleans, 25th August, 1859.

Dr. J. C. Aven: Sir, I cheerfully comply with the request of your agent, and report to you some of the effects I have realized with your Sarsaparilla. I have cured with it, in my practice, most of the complaints for which it is recommended, and have found its effect fully wonderful in the cure of the complaints for which it is recommended, and have found its effect fully wonderful in the cure of the complaints for which the cured before consuming his palate and the top of his mouth. Your Sarsaparilla steadily taken cured him in five weeks. Another was attacked by secondary symptoms in his nose, and the ulceration had eaten away a considerable part of it, so that I believe the disorder would soon reach his brain and kill him. But it yielded to my administration of your Sarsaparilla; the ulcers healed, and he is well again, not of course without some disfiguration to his face. A woman who had been treated for the same disorder by mercury was suffering from this poison in her bones. They had become so sensitive to the weather that on a damp day she suffered exeruciating pain in her Joints and bones. She, too, was cured entirely by your Sarsaparilla in a few weeks. I know from its formula, which your agent gave me, that this Preparation from your laboratory must be a great remedy; consequently, these truly remarkable results with it have not surprised me.
